

Jenalyn R. Napilitan

## My Goals

I want to get a good high school education and then go on to college because I want to see my dreams come true. I want to have a good job and a better life so that I can help my siblings and my father.

Someday I want to be a scientist because I want to help other people in their illness, especially those people who have heart disease. I know there are many people who die because of this illness. If I become a scientist, I will invent medicine to help heal people.
