

Maricar N. Novarto

I did not believe in myself when I studied in my old school, that is why I was so shy. This changed in Food for Hungry Friends school. Here, people do not laugh at me. I wish to go to high school and college because I want to help my family solve our problems, help other children and my cousins to read stories. My dreams for the future is to help others and to finish my education. I would like to say Thank You to Navitaire because they help us have our education and they help me get closer to achieving my dream and make my family happy.
