

Rommel A. Aparicio

Before I got to Food for Hungry Kinder School, I had no hope for myself and my family. When my father died, I almost gave up. Then one day my mother received a letter saying that I was accepted into Food for Hungry Kinder School. I was so happy and excited. I finally had hope.

I want to get a good high school education and then go to college because I want to have a better life which includes a good job and better housing for my family. I also want to help my country.
